CONTENTS TO VOLUME 65

PART 1 12 AUGUST 1974

The mean electromotive force generated by turbulence in the limit of perfect conductivity. H. K. MOFFATT *page* 1

Mean velocity and longitudinal dispersion of heavy particles in turbulent open-channel flow. B. MUTLU SUMER 11

On the behaviour of small disturbances in plane Couette flow. Part 2. The phenomenon of mode-pairing. A. P. GALLAGHER 29

Topological pumping of magnetic flux by three-dimensional convection. E. M. DROBYSHEVSKI and V. S. YUFEREV 33

The structure of turbulent density interfaces. P. F. CRAPPER and P. F. LINDEN 45

Considerations of the stability of certain heterogeneous shear flows including some inflexion-free profiles. GEORGE CHIMONAS 65

On the motion of a fluid–fluid interface along a solid surface. ELIZABETH B. DUSSAN V. and STEPHEN H. DAVIS 71

Measurements of velocity distributions in the wake of a circular cylinder at low Reynolds numbers. MICHIO NISHIOKA and HIROSHI SATO 97

The effects of surface roughness and tunnel blockage on the flow past spheres. ELMAR ACHENBACH 113

Shock-wave structure and intermolecular collision laws. SHEE-MANG YEN and WINNIE NG 127

A Markovian random coupling model for turbulence. U. FRISCH, M. LESIEUR and A. BRISSAUD 145

Mixing layers for highly underexpanded supersonic jets in hypersonic streams. JAMES P. MORAN 153

Reynolds-shear-stress measurements in a compressible boundary layer within a shock-wave-induced adverse pressure gradient. W. C. ROSE and M. E. CHILDS 177

The solution of viscous incompressible jet and free-surface flows using finite-element methods. R. E. NICKELL, R. I. TANNER and B. CASWELL 189

REVIEW

Methods and Results of Theoretical Oceanography, Volume 1, *by Wolfgang Krauss* 207

PART 2 28 AUGUST 1974

Natural convection in a shallow cavity with differentially heated end walls. Part 1. Asymptotic theory. D. E. CORMACK, L. G. LEAL and J. IMBERGER *page* 209

Natural convection in a shallow cavity with differentially heated end walls. Part 2. Numerical solutions. D. E. CORMACK, L. G. LEAL and J. H. SEINFELD 231

Natural convection in a shallow cavity with differentially heated end walls. Part 3. Experimental results. JORG IMBERGER 247

Wall pressure spectra calculations for equilibrium boundary layers. RONALD L. PANTON and JOHN H. LINEBARGER 261

The Kortweg–de Vries equation and water waves. Part 2. Comparison with experiments. JOSEPH L. HAMMACK and HARVEY SEGUR 289

An internal wave in a viscous heat-conducting isothermal atmosphere. T. N. STEVENSON, J. N. BEARON and N. H. THOMAS 315

Laser anemometer measurements of trailing vortices in water. G. R. BAKER, S. J. BARKER, K. K. BOFAH and P. G. SAFFMAN 325

Reflexion of a weak shock wave with vibrational relaxation. CHING-MAO HUNG and RICHARD SEEBASS 337

Inertial migration of rigid spheres in two-dimensional unidirectional flows. B. P. HO and L. G. LEAL 365

Sphere drag coefficient for subsonic speeds in continuum and free-molecule flows. A. B. BAILEY 401

REVIEWS

Cardiovascular Fluid Dynamics, edited by D. H. Bergel 411

Gas Transfer in the Lung, by B. A. Hills 411

PART 3 16 SEPTEMBER 1974

The hydrodynamic interaction of two unequal spheres moving under gravity through quiescent viscous fluid. E. WACHOLDER and N. S. SATHER 417

The structure of the viscous sublayer and the adjacent wall region in a turbulent channel flow. HELMUT ECKELMANN 439

Symmetrical flow past a uniformly accelerated circular cylinder. W. M. COLLINS and S. C. R. DENNIS 461

A laminar boundary layer on a rotating three-dimensional blade. Y. MIYAKE and S. FUJITA 481

Anomalous drag-reducing phenomenon at a water/fish-mucus or polymer interface. S. C. Ling and T. Y. J. Ling *page* 499

On the numerical computation of the optimum profile in Stokes flow. J.-M. Bourot 513

Entry flow in a curved pipe. M. P. Singh 517

Unstable waves on an axisymmetric jet column. G. E. Mattingly and C. C. Chang 541

Universal similarity at high grid Reynolds numbers. J. Schedvin, G. R. Stegen and C. H. Gibson 561

One-dimensional shock turbulence in a compressible fluid. Tomomasa Tatsumi and Hiroshi Tokunaga 581

Solution of the Boltzmann equation at the upstream and downstream singular points in a shock wave. J. P. Elliott and D. Baganoff 603

Part 4 2 October 1974

Transition to time-dependent convection. R. M. Clever and F. H. Busse 625

On the incipient breaking of small scale waves. M. L. Banner and O. M. Phillips 647

Dynamics of establishment of selective withdrawal of a stratified fluid from a line sink. Part 1. Theory. Hsien-Ping Pao and Timothy W. Kao 657

Dynamics of establishment of selective withdrawal of a stratified fluid from a line sink. Part 2. Experiment. Timothy W. Kao, Hsien-Ping Pao and Shuang N. Wei 689

Laminar flow past an abruptly accelerated elliptic cylinder at 45° incidence. H. J. Lugt and H. J. Haussling 711

Experimental and theoretical studies of dissolution roughness. Paul N. Blumberg and Rane L. Curl 735

Molecular models for permeation through thin membranes: the effect of hydrodynamic interaction on permeability. George H. Malone, Thomas E. Hutchinson and Stephen Prager 753

The stability of a trailing line vortex. Part 2. Viscous theory. Martin Lessen and Frederick Paillet 769

Kelvin–Helmholtz instability of a slowly varying flow. P. A. Drazin 781

An oscillating-boundary-layer theory for ciliary propulsion. C. Brennan 799

JOURNAL OF FLUID MECHANICS

The JOURNAL OF FLUID MECHANICS exists for the publication of theoretical and experimental investigations of all aspects of the mechanics of fluids.

EDITORS

PROF. G. K. BATCHELOR, DR H. K. MOFFATT

Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England

ASSOCIATE EDITORS

PROF. G. F. CARRIER, *Pierce Hall, Harvard University, Cambridge, Massachusetts* 02138, *U.S.A.*

PROF. W. C. GRIFFITH, *Mechanical and Aerospace Engineering, North Carolina State University, Raleigh, North Carolina* 27607, *U.S.A.*

PROF. M. J. LIGHTHILL, *Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England*

PROF. J. W. MILES, *Institute of Geophysics and Planetary Physics, University of California, P.O. Box* 1529, *La Jolla, California* 92037, *U.S.A.*

PROF. J. R. A. PEARSON, *Department of Chemical Engineering and Chemica Technology, Imperial College, London SW7 2AZ, England*

PROF. O. M. PHILLIPS, *Department of Earth and Planetary Sciences, The Johns Hopkins University, Baltimore, Maryland* 21218, *U.S.A.*

PROF. L. E. SCRIVEN, *Department of Chemical Engineering and Materials Science, University of Minnesota, Minneapolis, Minnesota* 55455, *U.S.A.*

ASSISTANT EDITORS

PROF. S. H. DAVIS (*Johns Hopkins*)

DR H. E. HUPPERT (*Cambridge*), DR M. E. MCINTYRE (*Cambridge*)

Authors wishing to have papers published in the JOURNAL should communicate them to any Editor or Associate Editor named above, choosing one in their own country where possible. The submission of two or three copies will expedite the process of assessment.

Authors are urged to write their papers clearly and attractively, in order to ensure that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 40 cm by 60 cm. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS is published in five volumes of four parts; semi-monthly, except in March, May, September and December, when monthly. Single parts cost £4.00 net (US $12.00 in the U.S.A. and Canada) plus postage. The 1974 subscription price of a volume (which includes postage) is £11.50 net (US $36.00 in the U.S.A. and Canada). Copies of the journal for subscribers in the U.S.A. and Canada are sent by air to New York to arrive with the minimum delay. Second class postage is paid at New York, N.Y. Claims for missing issues will be considered only if made after receipt of the subsequent issue.

CONTENTS TO VOLUME 66

Part 1 21 October 1974

The mechanics of fluid suspensions and polymer solutions: a report on Euromech 49. E. J. Hinch and A. Ziabicki *page* 1

The measurement of turbulence intensities using real-time laser-Doppler velocimetry. William K. George 11

Identification of turbulent wall eddies through the phase relation of the components of the fluctuating velocity gradient. Myon Ki Lee, Larry D. Eckelman and Thomas J. Hanratty 17

The instability of short waves on a vortex ring. Sheila E. Widnall, Donald B. Bliss and Chon-Yin Tsai 35

Rotational channel flow over small three-dimensional bottom irregularities. Jørgen Fredsøe 49

Oscillatory and collective instabilities in large Prandtl number convection. F. H. Busse and J. A. Whitehead 67

Stability of periodic waves in shallow water. P. J. Bryant 81

Interaction of water waves with two closely spaced vertical obstacles. J. N. Newman 97

Axisymmetric expansion of a gas from a nozzle into a vacuum. Thomas W. Tuer and George S. Springer 107

Relaxation effects, caused by relative motion, on shock waves in gas-bubble/liquid mixtures. L. Noordzij and L. van Wijngaarden 115

Boundary-layer-induced potential flow on an elliptic cylinder. Stanley G. Rubin and Frank J. Mummolo 145

The near wall jet of a normally impinging, uniform, axisymmetric, supersonic jet. J. C. Carling and B. L. Hunt 159

Development of a high-performance cryogenic shock tube. John C. Cummings 177

Friction factors in the theory of bifurcating Poiseuille flow through annular ducts. D. D. Joseph and T. S. Chen 189

Part 2 6 November 1974

Nonlinear wave interactions in shear flows. Part 1. A variational formulation. J. R. Usher and A. D. D. Craik 209

Experimental study of internal waves over a slope. David Cacchione and Carl Wunsch 223

On Laplace's tidal equations. John W. Miles 241

Expansions for the shape of maximum amplitude Stokes waves. A. C. Norman *page* 261

Shear-flow stability within the atmosphere of Venus. R. D. Cess and Harshvardhan 267

Vertical oscillations in a viscous and thermally conducting isothermal atmosphere. Patrick Lyons and Michael Yanowitch 273

Electrohydrostatic instability in electrically stressed dielectric fluids. Part 1. D. H. Michael, J. Norbury and M. E. O'Neill 289

On transition mechanisms in vertical natural convection flow. Yogesh Jaluria and Benjamin Gebhart 309

Oscillatory convection in a porous medium heated from below. R. N. Horne and M. J. O'Sullivan 339

Steady simple shear flow past a circular cylinder at moderate Reynolds numbers: a numerical solution. Charles A. Kossack and Andreas Acrivos 353

Slow viscous flow of an incompressible stratified fluid past a sphere. R. S. Chadwick and Y. Zvirin 377

Rotatory Brownian motion of a rigid dumbbell. Shousun C. Szu and J. J. Hermans 385

Optimal swimming of flagellated micro-organisms. O. Pironneau and D. F. Katz 391

Part 3 25 November 1974

Decay of two-dimensional homogeneous turbulence. J. R. Herring, S. A. Orszag, R. H. Kraichnan and D. G. Fox 417

Scaling of combustion-generated noise. H. A. Hassan 445

Line singularities in unbounded stratified flow. G. S. Janowitz 455

On the effects of boundary-layer growth on flow stability. M. Gaster 465

A boundary layer developing in an increasingly adverse pressure gradient. A. E. Samuel and P. N. Joubert 481

The effect of wall cooling on a compressible turbulent boundary layer. R. L. Gran, J. E. Lewis and T. Kubota 507

Non-Newtonian secretion flow in tubes. J. M. Fitz-Gerald 529

Free convection effects on steady MHD flow past a vertical porous plate. V. M. Soundalgekar 541

The vortex-street wakes of vibrating cylinders. Owen M. Griffin and Steven E. Ramberg 553

The effect of overtaking disturbances on the motion of converging shock waves. M. Yousaf 577

Stability and transition of buoyancy-induced flows in a stratified medium. YOGESH JALURIA and BENJAMIN GEBHART *page* 593

On the stability of extending films: a model for the film casting process. Y. L. YEOW 613

REVIEW

Earth's Rotation and Climate, by A. S. Monin 623

PART 4 11 DECEMBER 1974

Wave breaking in the presence of wind drift and swell. O. M. PHILLIPS and M. L. BANNER 625

Three-dimensional laminar boundary layers in crosswise pressure gradients. J. H. HORLOCK, A. K. LEWKOWICZ and J. WORDSWORTH 641

Steady flow in rapidly rotating circular expansions. J. S. WALKER 657

The pressure field due to a large circular capped air bubble rising in water. G. M. LAZAREK and H. LITTMAN 673

Source–sink flows in a rotating annulus: a combined laboratory and numerical study. D. A. BENNETTS and W. D. N. JACKSON 689

A numerical model of instability in axisymmetric jets. A. J. GRANT 707

An experimental study of Couette instability of stratified fluids. E. M. WITHJACK and C. F. CHEN 725

Interferometric study of two-dimensional Bénard convection cells. R. FARHADIEH and R. S. TANKIN 739

The dispersion of contaminant released from instantaneous sources in laminar flow near stagnation points. P. C. CHATWIN 753

Separation and the Taylor-column problem for a hemisphere. J. D. A. WALKER and K. STEWARTSON 767

Sound production at the edge of a steady flow. J. E. FFOWCS WILLIAMS 791

High-intensity light propagation and induced natural laminar flow. SIEGFRIED H. LEHNIGK and BERNARD STEVERDING 817
